10:				

Total:	1192	1081	100	Total Score = 676,800

Club: Bavarian Contest Club

Comments:

Wow, 2300 German stations in the log in 24 hours and no sun spots! Fantastic activity!

We just wanted to get the station ready for CQWW and we pulled out all the stops.

WAG doesn't have any M/2 category so we just ignored the rules and worked as many DLs as we possibly could. We often times operated on the same band in SSB and CW simultaneously.

We will submit a check log only but we had a fantastic time.

Thanks for all the QSOs.

We went to 10 m several times but never made it past Portugal. The low bands were noisy but we managed with many entries on 40 m and 80 m.

Lots of great German beer was consumed during the contest to improve propagation to DL. We think it helped.

We hope to see everyone in CQWW next week.
